

Serial No. : 10/716,908  
Filed : November 19, 2003

IN THE CLAIMS:

Please amend the claims as follows:

1. (currently amended) A display method for a navigation system for guiding a user to a destination, comprising the following steps of:

displaying a "Point of Interest (POI)" name list that shows candidate destinations to visit based on an instruction specified by a user;

selecting an unwanted POI name in the POI name list; ~~and~~  
removing all POIs having the unwanted POI name from the POI name list; and

selecting a destination in the POI name list from which the unwanted POI name has been removed for route guidance by the navigation system.

2. (original) A display method as defined in Claim 1, further comprising a step of repeating the step of selecting the unwanted POI name and the step of removing the unwanted POI names from the POI name list.

3. (currently amended) A display method as defined in Claim 2, further comprising ~~a step of selecting a POI name from remaining POI names in the POI name list as a destination, and~~ a step of determining an optimum route to the destination, thereby performing route guidance to the destination.

4. (currently amended) A display method as defined in Claim 1, wherein said step of displaying the POI name list includes a

Serial No. : 10/716,908  
Filed : November 19, 2003

step of determining a method of retrieving the POI names either by a place type ~~of~~ or a place name.

5. (original) A display method as defined in Claim 1, wherein said step of displaying the POI name list includes a step of determining an order of listing the POI names either by distance from a current user position or by an alphabetical order.

6. (original) A display method as defined in Claim 1, wherein said step of removing the POIs includes a step of filling other POI names in spaces in the POI name list where the unwanted POI names have been removed.

7. (original) A display method as defined in Claim 1, wherein said step of removing the POIs includes a step of adding new POI names to the POI name list where the unwanted POI names have been removed, and wherein the unwanted POI names are removed from the new POI names before being added to the POI name list.

8. (currently amended) A display method for a navigation system for guiding a user to a destination, comprising the following steps of:

displaying a "Point of Interest (POI)" name list that shows candidate destinations to visit based on an instruction specified by a user;

selecting an unwanted POI name in the POI name list;

executing either a first removal function for removing POIs having the unwanted POI name or a second removal function

Serial No. : 10/716,908  
Filed : November 19, 2003

for removing POIs of same type as that of the unwanted POI name; ~~and~~

removing all POIs having the unwanted POI name from the POI name list when the first removal function is executed and removing all POIs in the same type as that of the unwanted POI name when the second removal function is executed; and

selecting a destination in the POI name list from which the unwanted POI name has been removed for route guidance by the navigation system.

9. (original) A display method as defined in Claim 8, further comprising a step of repeating the step of selecting the unwanted POI name, the step of executing the first or second removal function, and the step of removing the unwanted POI names from the POI name list.

10. (currently amended) A display method as defined in Claim 9, further comprising ~~a step of selecting a POI name from remaining POI names in the POI name list as a destination, and~~ a step of determining an optimum route to the destination, thereby performing route guidance to the destination.

11. (currently amended) A display method as defined in Claim 8, wherein said step of displaying the POI name list includes a step of determining a method of retrieving the POI names either by a place type ~~of~~ or a place name.

12. (original) A display method as defined in Claim 8, wherein said step of displaying the POI name list includes a step

Serial No. : 10/716,908  
Filed : November 19, 2003

of determining an order of listing the POI names either by distance from a current user position or by an alphabetical order.

13. (original) A display method as defined in Claim 8, wherein said step of removing the POIs includes a step of filling other POI names in spaces in the POI name list where the unwanted POI names have been removed.

14. (original) A display method as defined in Claim 8, wherein said step of removing the POIs includes a step of adding new POI names to the POI name list where the unwanted POI names have been removed, and wherein the unwanted POI names are removed from the new POI names before being added to the POI name list.

15. (currently amended) A display apparatus for a navigation system for guiding a user to a destination, comprising:

means for displaying a "Point of Interest (POI)" name list that shows candidate destinations to visit based on an instruction specified by a user;

means for selecting an unwanted POI name in the POI name list; ~~and~~

means for removing all POIs having the unwanted POI name from the POI name list; and

selecting a destination in the POI name list from which the unwanted POI name has been removed for route guidance by the navigation system.

16. (original) A display apparatus as defined in Claim 15, further comprising means for repeating processes of selecting the

Serial No. : 10/716,908

unwanted POI name and removing the unwanted POI names from the POI name list.

17. (currently amended) A display apparatus as defined in Claim 16, further comprising ~~means for selecting a POI name from remaining POI names in the POI name list as a destination, and~~ means for determining an optimum route to the destination, thereby performing route guidance to the destination.

18. (currently amended) A display apparatus as defined in Claim 15, wherein said means for displaying the POI name list includes means for determining a method of retrieving the POI names either by a place type ~~of~~ or a place name.

19. (original) A display apparatus as defined in Claim 15, wherein said means for displaying the POI name list includes means for determining an order of listing the POI names either by distance from a current user position or by an alphabetical order.

20. (original) A display apparatus as defined in Claim 15, wherein said means for removing the POIs includes means for filling other POI names in spaces in the POI name list where the unwanted POI names have been removed.

21. (original) A display apparatus as defined in Claim 15, wherein said means for removing the POIs includes means for adding new POI names to the POI name list where the unwanted POI names have been removed, and wherein the unwanted POI names are removed from the new POI names before being added to the POI name list.

Serial No. : 10/716,908  
Filed : November 19, 2003

22. (currently amended) A display apparatus for a navigation system for guiding a user to a destination, comprising:

means for displaying a "Point of Interest (POI)" name list that shows candidate destinations to visit based on an instruction specified by a user;

means for selecting an unwanted POI name in the POI name list;

means for executing either a first removal function for removing POIs having the unwanted POI name or a second removal function for removing POIs of same type as that of the unwanted POI name; and

means for removing all POIs having the unwanted POI name from the POI name list when the first removal function is executed and for removing all POIs in the same type as that of the unwanted POI name when the second removal function is executed; and

selecting a destination in the POI name list from which the unwanted POI name has been removed for route guidance by the navigation system.

23. (original) A display apparatus as defined in Claim 22, further comprising means for repeating processes for selecting the unwanted POI name, executing the first or second removal function, and removing the unwanted POI names from the POI name list.

24. (currently amended) A display apparatus as defined in Claim 23, further comprising ~~means for selecting a POI name from~~

Serial No. : 10/716,908  
Filed : November 19, 2003

~~remaining POI names in the POI name list as a destination, and~~  
means for determining an optimum route to the destination, thereby  
performing route guidance to the destination.

25. (currently amended) A display apparatus as defined in  
Claim 22, wherein said means for displaying the POI name list  
includes means for determining a method of retrieving the POI names  
either by a place type ~~of~~ or a place name.

26. (original) A display apparatus as defined in Claim 22,  
wherein said means for displaying the POI name list includes means  
for determining an order of listing the POI names either by  
distance from a current user position or by an alphabetical order.

27. (original) A display apparatus as defined in Claim 22,  
wherein said means for removing the POIs includes means for filling  
other POI names in spaces in the POI name list where the unwanted  
POI names have been removed.

28. (original) A display apparatus as defined in Claim 22,  
wherein said means for removing the POIs includes means for adding  
new POI names to the POI name list where the unwanted POI names  
have been removed, and wherein the unwanted POI names are removed  
from the new POI names before being added to the POI name list.
